

SOUND AND VIBRATION SOFTWARE

BK CONNECT™ APPLETS

Specific tools for specific tasks
at a price that works for you

MADE FOR YOUR TASK

BK Connect applets are licensed templates from the BK Connect™ sound and vibration software platform that are designed to meet specific analysis requirements for industry- and application-specific tasks.

ONLY PAY FOR WHAT YOU NEED

BK Connect applets give you the power of the new BK Connect platform, but you only pay for the tools and functionality you need.

PART OF THE BK CONNECT ECOSYSTEM

Built on a common architecture, BK Connect applets let you collaborate with other teams using the BK Connect platform in the same data format and language.

BEYOND MEASURE

INTRODUCING BK CONNECT™ APPLETS

SOFTWARE THAT WORKS LIKE YOU WORK

BK Connect applets give you the flexibility and power of the BK Connect sound and vibration platform for user-defined, application-specific tasks. By only including the tools and functionality you use, you get a more focused and streamlined testing and analysis process at a price in line with your needs.

BUILT ON BK CONNECT

BK Connect applets are built upon the innovative BK Connect platform. This means each applet delivers the same world-class quality and usability, and allows you to share data and results with users of the full platform across your organization. You also have the ability to expand capabilities through more applets or by trading them in and upgrading to the full platform, ensuring you always have options should your needs change.

RESULTS YOU CAN TRUST

For 75 years, Brüel & Kjær has been helping the sound and vibration community move beyond their challenges. Such depth of insight gives us a unique understanding of what's crucial to support your individual testing and analysis requirements. That's why we have created BK Connect applets in a way that delivers all the reliability and benefits of the BK Connect software platform in a less expensive, packaged solution that is perfectly suited to your industry and tasks.

BK Connect Applets

There are four applets currently available, with more in development:

- BK Connect FFT Analysis Applet
- BK Connect FFT, CPB and Overall Analysis Applet
- BK Connect Order Analysis Applet
- BK Connect Acoustic Camera Applet

LAN-XI and LAN-XI Light

Depending on your needs, you can now choose between the standard LAN-XI hardware solution or the new 4-channel LAN-XI Light version.

Both deliver the raw power and reliability you need, but now with more options to meet your requirements for capabilities and price.
